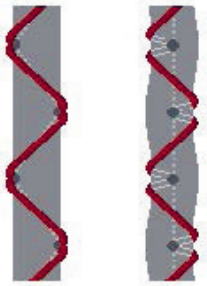
Soutache Classic Single (SCS) – Cord

Flexible Soutache System
Soutache embroidery is enjoying growing popularity worldwide and stands for creative and high-quality designs. To meet the increasing expectations of your customers and stay competitive, equipping your LÄSSER embroidery machine with a modern soutache attachment is a future-oriented investment.
Our innovative soutache attachment expands your creative possibilities with exclusive designs, sophisticated embellishments and customised designs.

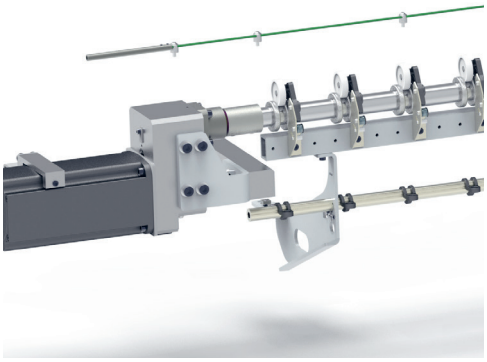
Maximum Flexibility and Precision
You can freely configure your SCS attachment, enabling a wide variety of design possibilities.
The SCS attachment can be adjusted to the desired repeat in just a few simple steps. Thanks to the user-friendly software, embroidering outlines and motives is effortless and highly precise. Borer and embroidery functions remain fully available, allowing maximum creative freedom.

The cord can be attached with zigzag or running stitches.



Soutache Classic Single (SCS) - Feed and Retract Mechanism

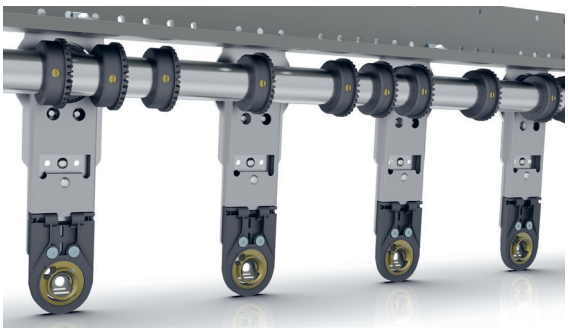
Best quality thanks to intelligent LÄSSER embroidery software
A specially developed algorithm controls the precise, servo motor-controlled feed and retract mechanism of the cord – synchronised with the needle movement and the rotation of the soutache wheel.



OPTIONS:

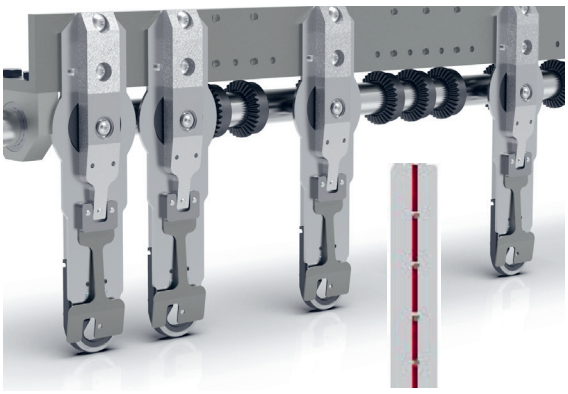
Soutache Classic Single (SCS) - RIBBON

Fashion trends come and go – one day cords are in style, the next it's all about ribbons.
Therefore, the **RIBBON** wheel can be easily added to your existing attachment.



Soutache Classic Single (SCS) - INLINE

A unique effect is created by embroidering the ribbon along its center line.
This is made possible by the **INLINE,** accessory part, which is mounted directly onto the SCS attachment.



Soutache is embroidered in the centre

Your benefits:

- High flexibility and precision
- Maximum productivity through seamless integration with the LÄSSER system
- Flexible selection of the repeat (8/4 – 12/4 – 16/4, etc.)
- Supports a variety of soutache applications: cord, ribbon, or inline
- No limitations on borer and embroidery functions
- Cord: up to 4 mm
- Ribbon: from 6 to 10 mm
- Various stitch-on types thanks to intelligent software
- Effortless embroidering of outlines and motives
- Highest quality thanks to active feed and retract mechanism
- Available from LÄSSER MVD71, MTC or ATC CUT onwards
